

**Quantifying Evapotranspiration from a Green Roof  
Analytically**

by

**Dominik Schneider**

Bachelor of Civil Engineering, U. of Delaware

A thesis submitted to the  
College of Engineering at  
Villanova University in partial fulfillment  
of the requirements for the degree of  
Master's of Science  
Civil and Environmental Engineering Department  
2011

This thesis entitled:  
Quantifying Evapotranspiration from a Green Roof Analytically  
written by Dominik Schneider  
has been approved for the Civil and Environmental Engineering Department

---

Dr. Bridget M. Wadzuk

---

Dr. Robert G. Traver, P.E., D. W.R.E.                      Date  
Professor, Dept. Civil and Environmental Engineering  
Director, Villanova Center for the Advancement of Sustainability in Engineering  
Director, Villanova Urban Stormwater Partnership

---

Dr. Ronald A. Chadderton, P.E., D. W.R.E.                      Date  
Chair, Dept. Civil and Environmental Engineering

Date \_\_\_\_\_

The final copy of this thesis has been examined by the signatories, and we find that both the content and the form meet acceptable presentation standards of scholarly work in the above mentioned discipline.

Schneider, Dominik (M.S., Civil Engineering)

Quantifying Evapotranspiration from a Green Roof Analytically

Thesis directed by Assistant Professor Dr. Bridget M. Wadzuk

ABSTRACT: Coefficients for the standardized Penman-Monteith equation as defined by the UN Food and Agriculture Organization and the American Society of the Civil Engineers.
