ABSTRACT

The natural monopoly TDC have over time aquired the necesarry infrastructure need for telemarketing services. This makes TDC the sole provider on the market. There is thus a need by the market for regulating it, because other firms would like to offer the same service. As they do not have the infrastructure, they need to get acces to the alreadyexisting infrastructure. ...

KAPITEL I

INDLEDNING

Let me see if this is really that good or some crap? Why am i forced to write my thesis like this, and would my teachers appreciate this style. What would happen if they are used to having the normal style in Denmark and not this american version. They might not be into "innovation" in this regard, but who am i to forecast what they would think? well I guess it is a big gamble betting on that they would like it, maybe it would be the wise choice to stick with what is normal instead of having to shock them in some

But then again would I let myself and my creativity be limited to what others might think? Then would I ever really be creative or just doing what everybody else does? It is a funny thought, but maybe one needs to dare once to see if one has what it takes. This could be a sign of confidence in oneself as in one's own judgement. On the other hand, i am still a student. So this level might not be required of me yet while writing my thesis.

This means all things considering I would have to go with the normal style, which is used in Denmark and not other places. I am not expecting any problems when i have chosen this standard.

1.1 PROBLEMFORMULERING

Let me see if this is really that good or some crap? Why am i forced to write my thesis like this, and would my teachers appreciate this style. What would happen if they are used to having the normal style in Denmark and not this american version. They might not be into "innovation" in this regard, but who am i to forecast what they would think? well I guess it is a big gamble betting on that they would like it, maybe it would be the wise choice to stick with what is normal instead of having to shock them in some

But then again would I let myself and my creativity be limited to what others might think? Then would I ever really be creative or just doing what everybody else does? It is a funny thought, but maybe one needs to dare once to see if one has what it takes. This could be a sign of confidence in oneself as in one's own judgement. On the other hand, i am still a student. So this level might not be required of me yet while writing my thesis.

This means all things considering I would have to go with the normal style, which is used in Denmark and not other places. I am not expecting any problems when i have chosen this standard.

... or your supervisor might use the margins for some comments of her own while reading.

1.2 AFGRÆNSNING

eeeeee

1.3 BAGGRUNDSHISTORIE

This section will list some information about problems using `classicthesis` in general or using it with other packages.

Beta versions of `classicthesis` can be found at the following Google code repository:

1.4 METODE

So far, this is a quite stable version that served a couple of people well during their thesis time. However, some things are still not as they should be.

1.5 STRUKTUR

It is easy to use the layout of `classicthesis.sty` without the framework of this bundle. To make it even easier, this section offers some
