

1 Verify sans font

The following line shows the normal verb command is unaffected:

DOI: 10.1016/j.sedgeo.2010.04.015

This is a sentence to test the various fonts for digits with or without `\sisetup{detect-all}` or `\setmathfont`. 1234567890, 1234567890, 1 234 567 890 m, 1 234 567 890 m, 1 234 567 890, 1 234 567 890.

Hay (2011) shows the problem with the DOI, I included this one because it has an ugly mixture of letters and digits, showing the problem to its full extent.
